PROJECTS

PROMPTPORT-AI TOOL DIRECTORY

PromptPort – An AI tool directory designed to help users easily discover, compare, and access the best AI tools across different categories. Built with Core PHP, the platform provides a structured, user-friendly interface for exploring AI solutions, making it a go-to resource for developers, businesses, and individuals.

Live Demo: [yourliveurl.com](#) | GitHub: [github.com/yourusername/promptport](#)

COURIER MANAGEMENT SYSTEM

Courier Management System – A web-based solution built with Core PHP to streamline courier operations. The system enables admins and agents to manage branches, track parcels, and update delivery statuses in real time. Users receive automated email notifications whenever their courier status changes, ensuring transparency and efficiency.
